

BASE MODEL HORSE STABLES

FRAME _ Steel Configuration

Guerilla Steel's 2.5m tall stable is a heavy-duty, modular unit built from 50x50mm RHS Galvanised Steel Tube, fully welded for unmatched strength and weather resistance. Made locally and designed to take on Aussie conditions, it's the kind of structure that looks sharp and holds up year after year.

ACCESS _ Half-Height Stall Swing Gate - Practical & Built-In

Every Guerilla Steel stable comes standard with a half-height swing gate measuring 1200mm wide x 1290mm high. It offers easy handler access, excellent visibility, and keeps horses secure without compromising airflow or connection. Custom gate options include sliding doors, Dutch-style upgrades and extra-wide, dual access or built in breezeways - we've got functional, high-performing designs for every stable setup.

PANELS _ Gal Mesh & Form Ply Panel Combinations

Our base model features 17mm black form ply on the lower half for weather protection, safety, and privacy, paired with 4mm heavy-duty galvanised mesh tops for airflow and visibility.

You can customise your panels with any mix of open sections, full mesh, solid ply, or vertical bars, tailored to suit your horses, workflow, and layout preferences.

These combinations don't just perform, they help create a stable that's safe, functional, and visually sharp.

ROOF _ Design & Protection

Monoclad® coated steel roof – chosen for its toughness, weather resistance, and long-term performance.

Guerilla Steel's roofing includes a 900mm front overhang for vital shade and rain protection at the entry, a 100mm rear overhang to direct runoff away from the structure, and flush side finishes that keep the overall layout clean and yard-friendly.

Stall Sizes

Standard - 4m x 4m x 2.5m

Large - 5m x 4m x 2.5m

XL - 5m x 4m x 2.5m

Frame

50x50mm RHS Galvanized Steel Tube
